

# Prunus Avium 'Plena'

*(Wild Cherry)*

Supplied by Barcham Trees

- The Prunus avium Plena has been cultivated since the 1700s in the UK but is not a native species.
- It is a medium/tall tree.
- The tree produces double white flowers in April/May.
- Its leaves turn bronze and fiery colours in autumn.
- It can grow in most soil conditions.
- It has interesting bark and is good for bees.
